BJÖRKÅ
FIRE-PROOF OVEN-MOULDS
OF GLASS

is a Swedish production of quality, which one can rely upon.

In BJÖRKÅ FIRE-PROOF OVEN-MOULDS of glass, baking, roasting and warming up will be made more rapid and much better than in moulds of earthenware, as in the transparent moulds one can easily see, when the dish is ready.

BJÖRKÅ FIRE-PROOF OVEN-MOULDS save time on serving the dish, as this can be done direct from the mould.

Directions for use of BJÖRKÅ FIRE-PROOF OVEN-MOULDS:

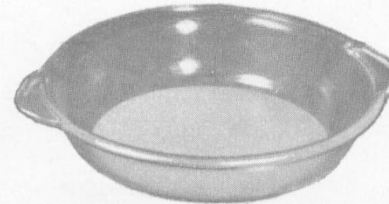

- 1** Used on wood-fire and electric stove a thread-grate should be placed under the mould, if the plate is too hot.
- 2** The mould must be dry outside and inside covered with liquid, melted grease etc.
- 3** On diluting one must always use warm liquids. Cold dishes must not be poured into warm moulds.
- 4** On taking the mould out of the oven, the same must not be hastily cooled. It should be placed on a dry, not wet or cold under-layer.

BJÖRKÅ FIRE-PROOF OVEN-MOULDS should be handled with the same care as other similar vessels.

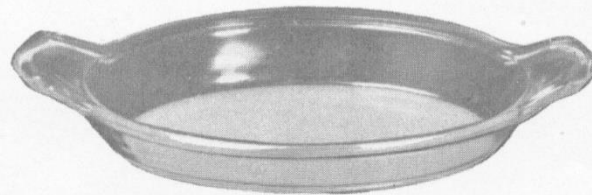

If the above directions are followed, you will have merely advantage and pleasure in using BJÖRKÅ FIRE-PROOF OVEN-MOULDS.
