

Denna anteckningsbok ("den svarta boken") tillhörde Einar Petersson ("Syra-Einar") som jobbade med etsning på Kosta under 1920-30-talen. Själva boken är inte daterad.

Vi fann den, tillsammans med "den vita boken", i en låda som stod intill den stora pantografen. Tyvärr föll en del kalkerade mönsterlappar ur innan vi förstod vad som hände.

Boken innehåller drygt 160 guillocheringsmönster, vissa med vad vi tolkar som "recept" (alltså instruktioner för uppsättningen av maskinen), samt ungefär 60 pantografmönster. Tyvärr finns inga servisnamn.

Mönstren är kalkerade direkt från glaset – med varierande resultat, och varierande "läsbarhet".

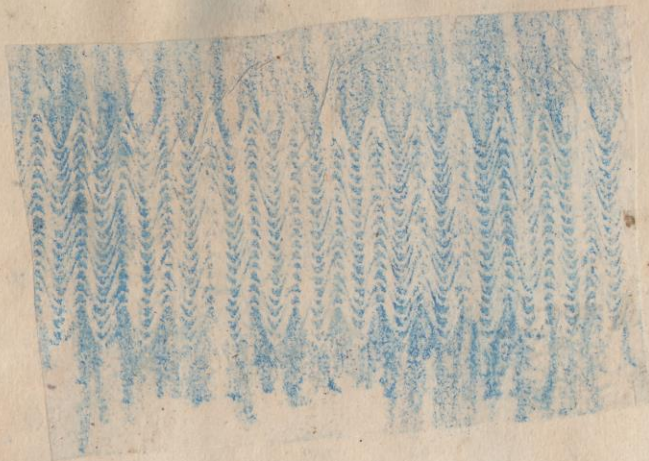

Boken är 19 x 12 cm, så originalet är mindre än denna publikation.

This notebook ("the black book") was owned by Einar Petersson who worked with etching glass in Kosta during the 1920-30-ies. The book itself is not dated.

We found it, together with "the white book", in a box we found together with the big pantograph. Unfortunately, some of the small pattern patches fell out before we understood what was happening.

The book contains some 160 guilloché patterns, some with what we believe are "recipes" (instructions for how to set up the machine), plus circa 60 pantograph patterns. Unfortunately there are no service names.

The patterns are traced directly from the glasses, with varied results, and varied "readability".
